

Iván Hernández, M.S., C.E., P.E.

Iván Hernández has offered expert structural engineering design, inspection and construction services in Puerto Rico for the past 20 years. Iván is a licensed structural engineer in Puerto Rico and Florida. After Hurricane María devastated the Island in 2017, he provided his knowledge and experience with structural damage assessment and mitigation recommendations on a variety of projects. His expertise includes the design of high-rise buildings as well as manufacturing, retail, infrastructure and residential facilities. His diversified experience provides complete support from preliminary design to project completion.
