Christian G. González is the CEO and Founder of Wovenware. Since 2003, Wovenware is the software development partner to midmarket companies that need to solve business problems through technology solutions. Wovenware recognized that companies often seek simple technology solutions, but need strategic advice on how to create those solutions and deliver value to the organization.

Today, Wovenware has more than 30 employees who are mostly engineers and computer scientist. We are part of Inc magazine's 5000 list of the fastest-growing private companies in the US and are exporting 35% of our services to 6 cities in the US and the Dominican Republic. Mr. González has a bachelor's degree in Computer Engineering and a Juris Doctor both from the University of Puerto Rico.

Mr. González is a member of the board of directors of the Puerto Rico IT Cluster, a non for profit organization dedicated to promote the integration, creation and sustainability of the IT sector in Puerto Rico, and a member of the board of Puerto Rico's Chapter of the Entrepreneurs Organization, a global network of 10,000 entrepreneurs around the world.
