

Bryan Lane
Civil Servant | Technologist | Writer | Speaker

Bryan Lane leads AI and data service delivery within the Federal Deposit Insurance Corporation with 20 years of experience leading advanced analytics and technology initiatives. Prior to joining the FDIC, Bryan co-founded the AI Center of Excellence at GSA and partnered with the DoD Joint AI Center to create the Joint Common Foundation, the first Department-wide, multi-cloud AI development platform. Bryan has partnered with federal agencies on establishing mature data governance and management practices, developed innovative approaches for leveraging data as a strategic asset, and advanced data value through artificial intelligence, automation, and machine learning. Prior to joining federal service, Bryan was the lead product manager for a commercial geospatial software company that was strategically acquired for \$250M and has advised or drafted nearly \$1B of AI and data related contracts. He regularly writes and speaks on AI and society to government, commercial, and academic audiences.
